The equipment should be installed and operated with a minimum distance 20 cm between the radiator and your body.

B Regulatory Information**FCC Information**

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential environment. This equipment generates, uses and can

radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

(1) this device may not cause interference, and

B Regulatory Information**EU Conformity Statement**

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized

European standards listed under the RE Directive 2014/30/EU, the LVD Directive 2014/35/EU, the RoHS Directive 2011/65/EU.

2014/53/EU, the EMC Directive 2014/30/EU, the LVD Directive 2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon

the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info.

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union.

See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: www.recyclethis.info.

Industry Canada ICES-003 Compliance

This device meets the CAN ICES-3 (B)/NMB-3(B) standards requirements.

This equipment should be installed and operated with a minimum distance 20 cm between the radiator and your body.

Cet équipement doit être installé et utilisé à une distance minimale de 20 cm entre la radiateur et votre corps.

C Packing List

1. Dashcam x 1

4. Camera x 1

2. Power Cord x 1

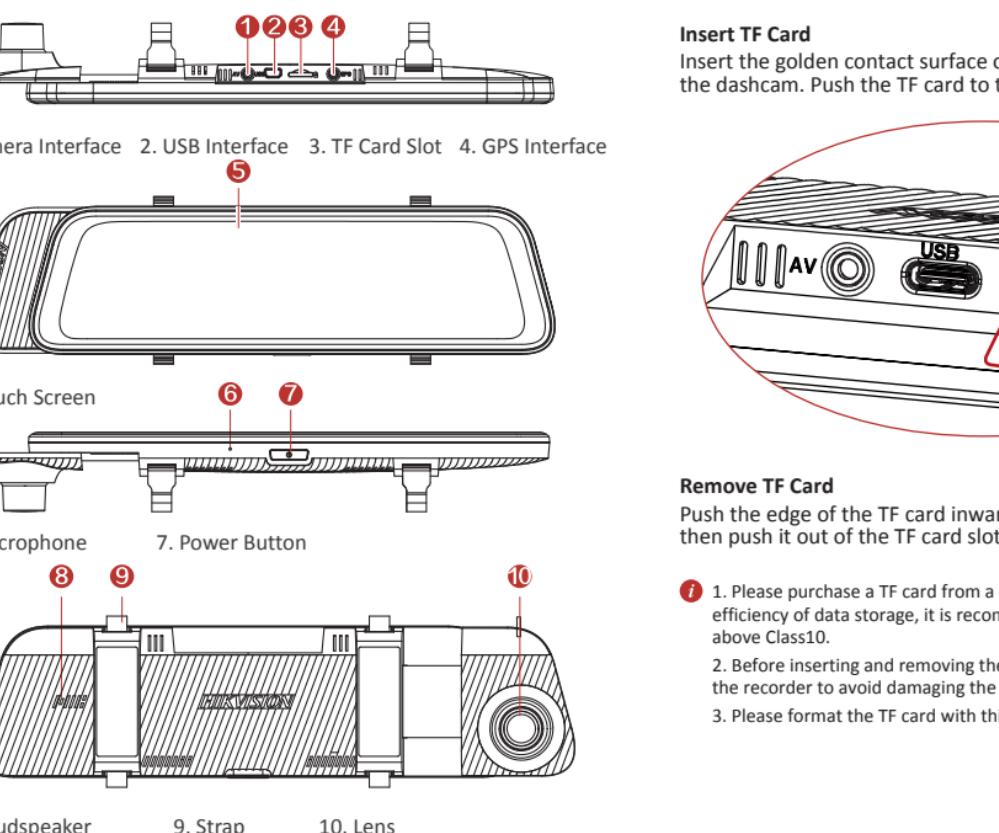

5. Accessory Package x 1

3. Strap x 1

6. Use Manual x 1

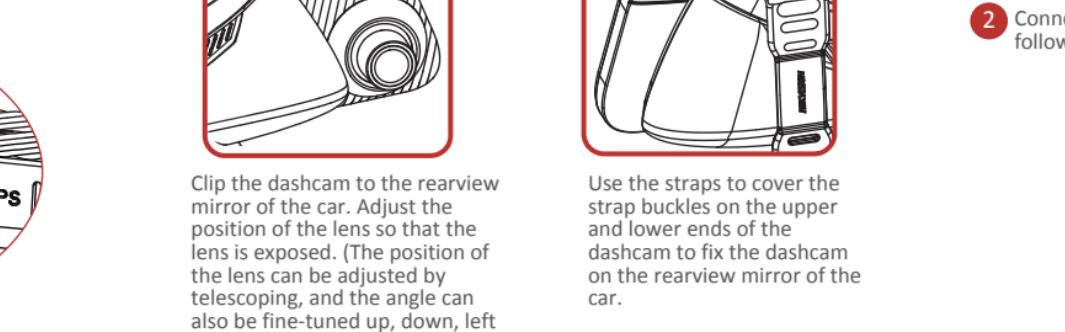

D Parts Introduction

E Install TF Card

Insert TF Card

Insert the golden contact surface of the TF card towards the rear of the dashcam. Push the TF card to the end until it clicks.

Remove TF Card

Push the edge of the TF card inward until you hear/feel a click, and then push it out of the TF card slot until you can remove it.

1. Please purchase a TF card from a regular channel. For the stability and efficiency of data storage, it is recommended to use a high-speed TF card above Class10.
2. Before inserting and removing the TF card, please be sure to power off the recorder to avoid damaging the TF card.
3. Please format the TF card with this machine before use.

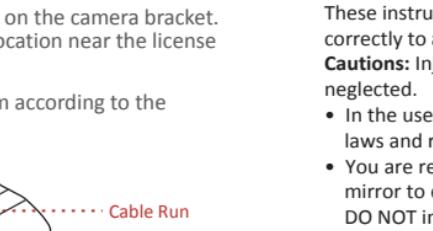

1. Please purchase a TF card from a regular channel. For the stability and efficiency of data storage, it is recommended to use a high-speed TF card above Class10.

2. Before inserting and removing the TF card, please be sure to power off the recorder to avoid damaging the TF card.

3. Please format the TF card with this machine before use.

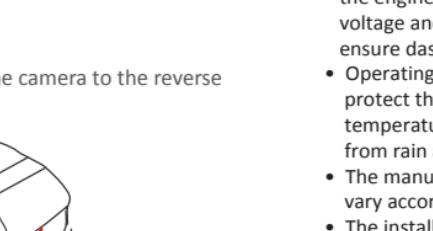

E Installation

1

Clip the dashcam to the rearview mirror of the car. Adjust the position of the lens so that the lens is exposed. (The position of the lens can be adjusted by telescoping, and the angle can also be fine-tuned up, down, left and right, the maximum can be adjusted 13°)

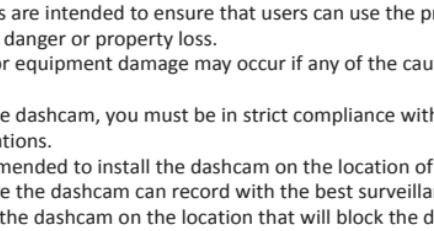

2

Paste the device onto the electrostatic film and route cable to the disaster box for power supply.

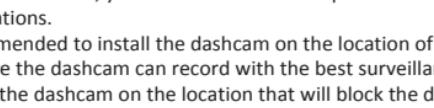

E Install Camera

1

Peel off the adhesive release paper on the camera bracket. Install camera on the appropriate location near the license plate.

2

Connect the camera to the dashcam according to the following cable run.

H Cautions

Safety Instruction

These instructions are intended to ensure that users can use the product correctly to avoid danger or property loss.

Cautions: Injury or equipment damage may occur if any of the cautions are neglected.

- Do not replace battery with an incorrect type.
- Do not disposal battery to fire or hot over, or mechanically crushing or cutting of a battery, that can result in an explosion.
- Do not leaving battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas.
- Do not leave battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.
- Do not use in high or low extreme temperatures.
- In the use of the dashcam, you must be in strict compliance with the laws and regulations.
- You are recommended to install the dashcam on the location of rear mirror to ensure the dashcam can record with the best surveillance view.
- Do not use in high or low extreme temperatures.
- Keep the user manual properly for future reference. See initial connection of dashcam in user manual.
- Purchase the TF card from legal channel. To ensure safe and stable data transmission, it is recommended to use TF card of Class 10 or above.
- The driving assistance function of the device only sends alarm or warning to the driver and can not replace the driver's judgment and operation. With the help of the device, you should drive carefully to avoid traffic accident or violation.
- Pedestrian or object recognition failure or recognition error may occur due to external factors. DO NOT overly rely on the driving assistance function.

I Troubleshooting

Trouble

The dashcam drops easily.

Starting the dashcam failed.

The dashcam powers off easily.

Recording is abnormal and indicates null.

Recording is blurred.

Recording is muted.

Dashcam reboots itself.

Mobile phone cannot connect to dashcam.

Solution

Clean the windshield before installation.

Check whether the 3M tape is tightly sticked to the electrostatic film before the installation.

Check whether the vehicle is started and power supply is normal.

Check whether the car charger is tightly connected.

Restore default: hold the **RESET** button until the startup music is heard.

Make sure the power cord is in good condition.

Make sure the power cord is tightly connected to the according interfaces.

Format the new TF card first before using the card.

To protect TF card from damage, shut down the dashcam before installing and uninstalling TF card.

If the dashcam is directly connected with the vehicle power system, you are recommended to power off the dashcam when the engine is off. Disconnect cigarette lighter to avoid insufficient voltage and abnormal startup. Reconnect cigarette lighter to ensure dashcam work normally when you start the car again.

Make sure the protective film is peeled off.

Check whether the windshield or the lens of dashcam is blurred.

Set audio setting on the device or turn on sound saving in HikDashcam app.

Turn on sound through the audio control function of the dashcam.

Check whether the car charger is tightly connected.

Make sure the device is not in the places of weak signal or no signal, such as underground garage.

Make sure there is no metal around the device because metal will interfere with GPS signal.

Make sure the location where the device is installed is not placed with radiation protection film. The film will interfere with GPS signal.

Trouble

The mobile phone cannot display recordings.

Dashcam does not support data transmission and the supplied power cord is only for charging.

If you need to transfer data, please connect TF card to your computer.

It may be caused by the interference of the surrounding Wi-Fi signals. Please use the dashcam in an environment of less interference.

Shutdown unnecessary programs in your phone to release some resources for HikDashcam app and reconnect Wi-Fi.

The default password is 123456789. If you have revised the password, reinput the password by the following steps.

1. Hold the **RESET** button on dashcam until the startup music is heard and the dashcam is restored to defaults.

2. Go to Wi-Fi Connection interface in HikDashcam app.

3. Select Wi-Fi and log in with default password 123456789.

Check whether the GPS function is enabled.

Normally, the GPS function is enabled by default.

Make sure the device is not in the places of weak signal or no signal, such as underground garage.

Make sure there is no metal around the device because metal will interfere with GPS signal.

Make sure the location where the device is installed is not placed with radiation protection film. The film will interfere with GPS signal.
